

Monday, 25 June 2012

08:30	<p style="text-align: center;">2 <u>General Session 1: Synthesis</u> Plaza Auditorium Double Walled Carbon Nanotubes Prof Morinobu Endo, Research Center for Exotic Nanocarbons (JST), Shinshu University, Japan <u>Self-assembled monolayers of coordination nanoparticles as pre-catalysts for the growth of Single-Walled Carbon Nanotubes with narrow diameter distributions</u> Vincent Huc, University of Paris-South, Paris, France, France <u>Tailoring the Diameter of Single-walled Carbon Nanotubes for Optical Applications</u> MSc Yina Tian, Department of Applied Physics, Aalto University, Finland <u>Controllable CVD Synthesis of Single-Wall Carbon Nanotubes Using the Mist Flow Method</u> Mr Yun Sun, Department of Chemistry, Naoova University, China <u>Single chirality armchair carbon nanotubes: from purification to controlled synthesis</u> Ming Zheng, National Institute of Standards and Technology, United States</p>
10:30	<p style="text-align: center;">3 Morning Tea & Posters Plaza Foyer</p>
11:00	<p style="text-align: center;">4 <u>General Session 2: Synthesis</u> Plaza Auditorium Controlled CVD Growth and Photochemical Engineering of Graphene towards Electronic Applications Prof Zhongfan Liu, Centre for Nanochemistry, College of Chemistry and Molecular Engineering, Peking University, China <u>Towards the total synthesis of Zig-Zag Single Walled Carbon Nanotubes with well defined Diameters</u> Etienne Andre, University of Paris-South, Paris, France, France <u>The Limits of CNT Growth</u> Dr Fena Dina, ITC, Hona Kona Polytechnic University, Hona Hom, Hona Kona, Hona Kong <u>The influences of electromagnetic fields on morphology of carbon nanotube fibres</u> Mr Matthew James, University of Cambridge, United Kingdom <u>The effect of low supersaturation on the synthesis of metal-catalyst-free CNTs at 500 °C</u> Mrs Marina Belkina, University of Western Sydney, Australia <u>Strategies towards morphology control in CNT fibre</u> Ms Catharina Paukner, Dept Materials Science, University of Cambridge, United Kingdom</p>
12:45	<p style="text-align: center;">5 Lunch & Posters Plaza Foyer</p>
13:45	<p style="text-align: center;">6 <u>General Session 3: Synthesis</u> Plaza Auditorium Super-Growth CNT Forests: Optimizing Form with Function Dr Don Futaba, Technology Research Association for Single Wall Carbon Nanotubes (TASC), AIST Tsukuba, Japan <u>Analytical Ultracentrifugation Determination of Dispersed SWCNT Core and Shell Densities</u> Dr Jeffrey A Faan, National Institute of Standards and Technology, United States <u>Resolving Strain in Carbon Nanotubes and Graphene at the Atomic Level</u> Dr Jamie H Warner, University of Oxford, United Kingdom <u>Alignment Control of Carbon Nanotube Forests from Random to Nearly Perfectly Aligned by Utilizing Crowding Effect</u> Dr Mina Xu, 1. TASC, Japan, 2. AIST, Japan, Japan <u>Selective synthesis of semiconducting SWCNTs with high quality and narrow diameter distribution</u> Dr Peng-Xiang Hou, Institute of Metal Research, Chinese Academy of Sciences, China</p>
15:15	<p style="text-align: center;">7 Afternoon Tea & Posters Plaza Foyer</p>
16:15	<p style="text-align: center;">8 <u>General Session 4: Properties</u> Plaza Auditorium <u>Synthesis, Physics, and Potential Applications of Aligned Carbon Nanotubes</u> Zhifeng Ren, Boston College, United States <u>A Comparative Study of the Growth of Vertically-Aligned Carbon Nanotubes from FePt and Fe Catalyst</u> Dr Shisheng Li, Institute of Metal Research, Chinese Academy of Sciences, China <u>Influence of the ultraviolet irradiation and high magnetic field on the transport properties of the individual C₆₀ peapod</u> Mr Vladimir S Prudkovskiy, Laboratoire National des Champs Magnétiques Intenses, CNRS-UPR 3228, Toulouse, France, France <u>AFM Nanomanipulation of Gold Nanoparticles for Plasmonically Enhanced Raman Spectroscopy on Electrically Contacted SWNTs</u> Kirsten M Strain, EaStCHEM School of Chemistry, the University of Edinburgh, Edinburgh, United Kingdom <u>Luminescence Properties of Oxygen-Doped Carbon Nanotubes</u> Yuhei Mivauchi, Institute of Advanced Energy, Kyoto University, Japan & Japan Science and Technology Agency, PRESTO, Japan <u>Electron Emission from One-Atom-Thick Surfaces of Carbon Nanotubes and Graphene Nanoribbons Driven by Internal Electric Field</u> Dr Xianlong Wei, National Institute for Materials Science (NIMS), Namiki 1-1, Tsukuba, Ibaraki, 305-0044, Japan, Japan</p>
18:00	<p style="text-align: center;">1 <u>Welcome Reception & Poster Session</u> Plaza Foyer <u>Structured Graphene - Spinnable CNT and Beyond</u> Ms Chi P Huvnh, CSIRO Materials Science and Engineering, Australia <u>High resolution SEM imaging of carbon nanotubes; deconvolution and retrieval of intrinsic nanotube dimensions</u> Henrik Jackman, Karlstad University, Sweden <u>Formation and the Multiple Intra-Tube Junctions in Peapods Derived DWNTs</u> Mr Ziwei Xu, ITC, Hona Kona Polytechnic University, Hona Hom, Hona Kona, Hona Kong <u>Formation of threaded nanotube fiber and giant carbon onions on C irradiated Cu grids</u> Dr Shoab Ahmad, Government College University, Pakistan</p>

- Prof Dr Ursula Dettan Wiedukowska. Korea University. School of Electrical Engineering. Korea
CVD synthesis of small-diameter nitrogen-doped single-walled carbon nanotubes using acetonitrile
 Dr Erik Einarsson. The University of Tokyo. Japan
- A comparison study of catalytic oxidation and acid oxidation to prepare carbon nanotubes for filling with Ru nanoparticles
 Lei Ge, The University of Queensland, School of Chemical Engineering, Brisbane, Australia
- Reaction analysis on CNT Growth mechanism by eDIPS method using ^{13}C carbon source
 Dr Takavoshi Hirai. Technology Research Association for Single Wall Carbon Nanotubes. Japan
- Effect of Gas Pressure on Growth Process of Horizontally Aligned Single-Walled Carbon Nanotubes on Quartz Substrates
 Mr Taiki Inoue. Department of Mechanical Engineering. The University of Tokyo. Japan
- Highly Efficient Individual Dispersion of Single-Walled Carbon Nanotubes Using a Chitosan Derivative
 Dr Duckiong Kim. Korea Institute of Machinery and Materials. Korea
- Dispersion property evaluation of various single-walled carbon nanotubes suspended with a biocompatible dispersant
 Dr Duckiong Kim. Korea Institute of Machinery and Materials. Korea
- Fabrication and Characterization of Fully Flattened Carbon Nanotubes and Graphene Nanoribbons
 Assoc Prof Ryo Kitaura. Nagaoka University. Japan
- Effect of sulfur precursors on diameter-controlling of SWCNTs by eDIPS method
 Dr Masaharu Kivomiva. Technical Research Association for Single Wall Carbon Nanotube (TASC). Japan
- Inorganic Multilayered Structures on a Graphene and Their Application as the Novel Nanocatalyst Platform
 Dr Ha-Jin Lee. Korea Basic Science Institute. Korea
- Narrow-Chirality Distributed Growth of Single-Walled Carbon Nanotubes by Diffusion Plasma CVD and its Growth Mechanism
 Koshi Murakoshi. Department of Electronic Engineering. Tohoku University. Japan
- Efficient growth of single-walled carbon nanotubes from nanodiamond seeds
 Dr Rvota Neaishi. Department of Applied Physics. Osaka University. Japan
- Effect of growth pressure on synthesis of vertically aligned carbon nanotubes using thermal chemical vapor deposition
 Sangeun Park, BK21 Physics Research Division, Department of Physics, Sungkyunkwan University, Suwon 440-746, Republic of Korea. Korea
- Mechanism of Electric-Field-Induced Separation of Metallic and Semiconducting Single-Wall Carbon Nanotubes
 Ms Fusako Sasaki. Technology Research Association for Single Wall Carbon Nanotubes (TASC), Japan
- Helium ion beam lithography for carbon nanotube nanogap electrodes
 Cornelius Thiele. Karlsruhe Institute of Technology. Germany
- Influence of nitrogen incorporation on the diameter of single-walled carbon nanotubes
 Mr Theerapol Thurakitserree. The University of Tokyo. Japan
- Vertically-aligned Carbon Nanotube Growth Using Iron Oxide Nanoparticles
 Mr Kazuki Yamada. Tokyo University of Science. Japan
- Carbon Nanotube Synthesis by Electrochemical Reductive Deposition at Room Temperature
 Dr Satoshi Yasuda. Hokkaido University. Japan
- Synthesis of Ultralong Semiconducting Defect-free Carbon Nanotubes
 Dr Rufan Zhang, Department of Chemical Engineering, Tsinghua University, China
- Oxygen-isotope labeled titania: Ti^{18}O_2 and Ti^{17}O_2
 János Koltai, Dept. of Biological Physics, Institute of Physics. Loránd Eötvös University, Pázmány Péter sétány 1/A, H-1117 Budapest. Hungary. Hungary
- Ferromagnetic properties of single walled carbon nanotubes doped with manganese oxide nanoparticles using an electrochemical method
 Ki Nam Yun. Korea University. Korea
- Measurement of mass variations of fine CNT yarns due to particle adhesion
 Catia Baron Aznar. University of Cambridge. United Kingdom
- Catalyst Control for Longer Single-Wall Carbon Nanotubes with Smaller Diameters
 Ms Zhongming Chen, Department of Chemical System Engineering. School of Engineering, The University of Tokyo, Japan
- Degradation of Carbon Nanotubes in Field Emission
 Takehiro Emi. Osaka University. Japan
- Characterization of titania nanotube arrays with carbon nanotubes for drug delivery applications
 Karan Gulati. University of Australia. Australia
- Reduction of Boundary Thermal Resistance using Single-walled Carbon Nanotube Film
 Yushi Iba. Department of Mechanical Science Engineering. Hiroshima University, Japan
- Transparent film heater from the spun multi-walled carbon nanotubes
 Dr Hoonsik Jana. Korea Research Institute of Standards and Science. Korea
- Stacking of Water Molecules in Hydrophilic Graphene Oxides Characterized by Kelvin Probe Force Microscopy
 Prof Dr Hae Kyung Jeona. Daeju University. Korea
- Single Group 8 Metal Atom (Fe, Ru) Catalyzed C-C Bond Reorganization of Fullerenes
 Dr Masanori Koshino. Nanotube Research Centre. National Institute of Advanced Industrial Science and Technology (AIST), Japan
- Field emission characteristics of novel point-type carbon nanotube emitters for next-generation x-ray sources
 Hansung Lee, Faculty of Nanotechnology and Advanced Materials Engineering. Seiong University, Seoul, Korea
- Effect of laser heating on carbon nanotube bundles probed by Raman scattering
 Dr Jose R Mialichi. UNICAMP. Campinas. Brazil. Brazil
- Exciton Dynamics in Hole-doped Single-walled Carbon Nanotubes
 Shinichiro Mouri. Institute of Advanced Energy. Kyoto University. Japan
- Antiretrogradation Functions of Carbon Nanotubes with Defect Graphene-like Structures for Rubber Materials in Their Composites
 Mr Tomoya Nagaoka. Department of Applied Chemistry. Faculty of Science. Tokyo University of Science. Japan
- The effect of femtosecond laser irradiation on photoluminescence emission of single wall carbon nanotubes
 Satoru Shoji. Department of Applied Physics. Osaka University. Japan
- Field emission characteristics of carbon nanotube pastes with nm-sized Ni and TiO_2 powders
 Sora Sim. Seiong University. Korea
- MeV electron-beam induced decoration of Pt nanoclusters on graphene for transparent conductive electrodes
 Mr Myoung-Jun Cha. BK21 Physics Research Division. Sunakwunkwan University, Korea
- ECR-PECVD method for fabrication of few-layer graphene films
 Chih-Chen Chang. Industrial Technology and Research Institute of Taiwan. Taiwan
- Fabrication and Characterisation of Chemically Converted Graphene (CCG) Enzymatic Hydrogel Electrodes
 Miss Willo M Grosse, Intelligent Polymer Research Institute. ARC Centre of Excellence for Electromaterials Science, University of Wollongong. Australia
- Boron Nitride Nanoribbons Made From Exfoliation
 Ching-eh Hung, NASA Glenn Research Center. Cleveland Ohio 44135, United States
- Graphene hybrid materials for energy conversion
 Dr Nikolaos Karousis, Theoretical and Physical Chemistry Institute. National Hellenic Research Foundation, 48 Vassileos Constantinou Avenue. Athens. Greece
- Enhanced electrical conductivity of gold doped graphene films by microwave treatment
 Yooseok Kim. BK21 Physics Research Division. Sunakwunkwan University. Suwon 440-746, Korea
- Carrier transport properties of multilayer graphene with turbostratic structure
 Dr Rvota Neaishi. Department of Applied Physics. Osaka University. Japan
- The transparent conductive oxygen barrier graphene oxide film deposited via a self-assembly coating method
 Dr Kwonwoo Shin. Korea Electronics Technology Institute. Korea
- Non-equilibrium thermal transport simulation of conical carbon nanofiber nanostructures

- Modulation of the Electronic Property of Graphene via the Hydroxylated and Defective SiO₂ Substrates
Shu-Jiuan Huang, Materials and Chemical Research Laboratories, Industrial Technology Research Institute, Taiwan
- Bio-molecule separation and delivery
Anita J Hill, CSIRO, Australia
- Multiple exciton generation by a single photon in semiconducting single-walled carbon nanotubes
Satoru Konabe, University of Tsukuba, Japan
- Lattice Properties of Graphene Containing Extended Defects Using A Quasi Harmonic Approximation
Dr Elie A Mouiaes, Universidade Federal de Minas Gerais (UFMG), Brazil
- Directional Neurite Outgrowth on Super-CNT substrate
Ms Li Fan, Tsinghua University, China
- A Study on Optically Active of Mussel Adhesive Coated Double Walled Carbon Nanotube
Prof Yong Chae Jung, Research Center for Exotic Nanocarbons (JST), Shinshu University, Japan
- Modification of CNFET properties via inorganic complexes grafting
Gurvan K Madaur, Laboratoire de Chimie Inorganique, France
- Are functionalized multi-walled carbon nanotubes biodegraded within the living body?
Dr Yoshinori Sato, Graduate School of Environmental Studies, Tohoku University, Japan
- Exploiting the self-assembly of amphipathic hydrophobic proteins to engineer biocompatible surfaces
Dr Wenrong Yan, Deakin University, Australia
- In Vivo Biodistribution of Single-Walled Carbon Nanohorns Depending on Their Sizes
Dr Minfang Zhana, Nanotube Research Center, AIST, Japan
- Structural studies of titania nanotube
Tereza Brunatova, Charles University, Faculty of Mathematics and Physics, Dep. of Condensed Matter Physics, Prague, Czech Republic, Czech Republic
- Fabrication of single-crystalline core-shell nanofibres on porous alumina templates
Dr Jinhua Fan, CSIRO, Australia
- Titania nanotube arrays: improved drug loading and releasing characteristics by tailoring nanotube structures
Karan Gulati, University of Australia, Australia
- Single-walled boron nitride nanotubes synthesized in single-walled carbon nanotubes
Mr Ryo Nakanishi, Department of Chemistry, Nagoya University, Japan
- Synthesis, structural analysis and mechanical properties of aluminum matrix/boron nitride nanotube hybrid composites
Ms Maho Yamauchi, WPI Center for Materials Nanoarchitectonics (MANA), National Institute for Materials Science (NIMS), Japan
- Functionalisation of boron nitride nanotubes: preparation, underlying mechanism and potential bio-applications
Dr Wenrong Yan, Deakin University, Australia
- Carbon Nanotubes as Catalyst Support in Polymer Electrolyte Membrane Fuel Cells
Prof Naotoshi Nakashima, Dept. Appl. Chem. & WPI-I2Kyushu University, Motooka 744, Fukuoka 819-0395, Japan & JST-CREST, Japan
- Characteristics of SWNT-Chitosan-oligomer membrane, formed by evaporative casting method
Mr Ahmed Ali Alshahrani, Soft Materials School of Chemistry, University of Wollongong, Australia
- Electrochemical performance of α -Cyclodextrin and Carbon Nanotube Composites
Prof Dr Hae Kwun Jeon, Daegu University, Korea
- Supercapacitor based on tungsten oxide nanorods/MWCNT/PEDOT:PSS composite films
Mr Jin Joo Jung, Department of Physics, Kyungpook University, Daegu, Korea, Korea
- Graphene-mesoporous silica composite as a rechargeable lithium-sulfur battery cathode material
Mr Kyounghwan Kim, Korea Advanced Institute of Science and Technology, Korea
- Nitrogen doped CNTs for oxygen reduction reaction in acidic media
Rapidah Othman, The University of Queensland, School of Chemical Engineering, Brisbane, Australia
- Fully Flexible Organic Solar Cells based on Spinnable Carbon Nanotube Sheet Electrodes
Dr Kallista K Sears, CSIRO Materials Science and Engineering, Australia
- P-type doping of SWCNT transparent conductive films
Dr Jong Hun Han, Korea Electronics Technology Institute, Korea
- High-resolution microscopy of carbon nanotubes/polymer composites: understanding the molecular interactions for highly efficient organic solar cells
Mr Marco Notarianni, Queensland University of Technology, Australia
- Carbon nanotube composite membranes prepared by template synthesis using nanoporous alumina and catalyst-free chemical vapor deposition (CVD)
Taria Altalhi, School of Physical and Chemical Science, Flinders University, Australia
- The chemical environment resistance sensitivity of the defectless and Ar-plasma etched carbon nanotube and nanobud networks
Dr Ilva V Anoshkin, Aalto University, Finland
- Controlled Synthesis of Polymer/Carbon Nanotubes Composites in Organic and Aqueous Solutions
Dr Hoang The Ban, Technology Research Association for Single Wall Carbon Nanotubes, Japan
- Fabrication of nanocomposite of vertically-aligned CNTs in PDMS matrix
Mr JinHyeok Cha, Department of Mechanical Engineering, The University of Tokyo, Japan
- A fully vacuum-sealed miniature X-ray tube based on the triode CNT emitters
PhD Sungho Choi, 1Nano Electron-Source Creative Research Center, ETRI, Korea
- A new intrinsic desorption method for graphene-based gas sensors
Guillaume Ganuchaud, ONERA, France
- High-mobility carbon nanotube thin-film transistors on plastic fabricated by high-throughput transfer and flexo printing technique
Kentaro Higuchi, Department of Quantum Engineering, Nagoya University, Japan
- Boron Nitride Nanotube Reinforcement of SiC Composites
Janet B Hurst, NASA Glenn Research Center, United States
- CNT-organic-composited OLEDs driven by alternating current
So-Yeon Jun, Dept. Physics, Hankyong University of Foreign Studies, Korea
- Development of a highly dense triode CNT emitter for super-miniature X-ray tubes
Mr Jun-Tae Kang, 1Nano Electron-Source Creative Research Center, ETRI, Korea
- Carbon nanotube heater operating with low voltage
Dr Duckjona Kim, Korea Institute of Machinery and Materials, Korea
- Carbon nanotube wires for electromagnetic devices
Mr Lukasz Kurzepa, University of Cambridge, United Kingdom
- Facile Fabrication of Carbon Nanotube Devices on Various Substrates by Transfer Printing Method
Prof Ji-Yong Park, Department of Physics and Division of Energy Systems Research, Aio University, Korea
- The use of Single-walled Carbon Nanotubes and polyaniline composite as ion selective electrode in Capacitive deionization (CDI)
Caijuan Yan, University of South Australia, China

10:30	<p style="text-align: center;">27 Morning Tea & Posters Plaza Foyer</p>

Fabrication of nanoparticle superlattice sheets
A/Prof Wenlong Chen, Monash University, Australia
Growing Boron Nitride Nanotube Films from Boron Ink Painting
Dr Luhua Li, Deakin University, Australia

Hexagonal BN atomic layer
Li Song, Research Center of Exotic Nanocarbons, Shinshu University and NSRL, University of Science and Technology of China, Japan

Boron nitride nanotubes for biological and medical applications
Dr Gianni Ciofani, Fondazione Istituto Italiano di Tecnologia, Italy

12:45

29
Lunch

Plaza Foyer

13:45

30
Functional Carbon Composites: Controlled Synthesis

Meeting Room P2
The Fibre Route to CNT Composites
Prof Alan H Windle, University of Cambridge, United Kingdom

Cross-linking MWCNTs by perfluorophenylazide (PFPA) for reinforcement of CNT spun fibers and unidirectionally aligned sheets

Kazumichi Nakamura, Department of Electrical and Electronic Engineering, Shizuoka University, Japan

Improving the mechanical properties of epoxy nanocomposite using multiwalled carbon nanotube functionalized by a novel plasma treatment

Mr Zhiaiana Chen, Institute for Frontier Materials, Deakin University, Australia
Towards large scale aligned carbon nanotubes based composite production
Dr Pascal Boulanger, Laboratoire Francis Perrin (CEA CNRS URA 2453), DSM-IRAMIS-SPAM, CEA Saclay, 91191 Gif sur Yvette, France, France

Flexible three-dimensional carbon nanotube/methylcellulose composites

Dr Lixiana Yuan, University of Sydney, Australia

39
Graphene: Synthesis

Meeting Room P1
Self-assembly of Chemically Converted Graphene for Energy Applications

Gaoquan Shi, Department of Chemistry, Tsinghua University, Beijing, China

Uniform single-layer graphene growth on SiO₂ substrate by diffusion plasma CVD and its growth mechanism

Dr Toshiaki Kato, Department of Electronic Engineering, Tohoku University, Japan

Autonomously controlled homogenous growth of wafer-sized high-quality graphene via a smart Janus substrate

Dr Donavun Wan, Shanghai Institute of Ceramics, CAS, China

Studies of graphene growth on copper using gradients of temperature and carbon concentration

Dr Johan Ek Weis, Depto. Fisica, Universidade Federal de Minas Gerais (UFMG), Brazil

Two selective growth modes for graphene on Cu substrate

Mr Woosok Song, BK21 Physics Research Division, Sungkyunkwan University, Korea

Investigating Graphene Growth on Ni Surface Using Isotope-Labeled Alcohol Catalytic Chemical Vapor Deposition

Dr Pei Zhao, Department of Mechanical Engineering, The University of Tokyo, Japan

44
Metrology & Methodology: Synthesis

Meeting Room P3
Opportunities and Challenges for Carbon Nanomaterials in Electronic and Photovoltaic Devices
Mark Hersam, Department of Materials Science and Engineering, Northwestern University, United States

Feedback control and modeling of a laser assisted CVD process for carbon nanotube growth

Yoeri van de Burat, Eindhoven University of Technology, The Netherlands

Selective growth of well aligned ultralong carbon nanotubes out of randomly oriented short nanotubes in catalyst reaction substrates

Dr Rufan Zhang, Department of Chemical Engineering, Tsinghua University, China

Chemical Vapor Deposition Synthesis and Physical Properties of Horizontally Aligned Carbon Nanotube

Mr Tohru Watanabe, National Institute for Materials Science, Japan

Dynamic Characterization and Fabrication of Carbon Nanostructures

Prof Litao Sun, SEU-FEI Nano-Pico Center, Key Lab of MEMS of MOE, Southeast University, China

49
Theory & Modeling of Carbon Nanotubes

Meeting Room P5
The Origin of SWCNT's Chirality and Strategies of Chirality-Selection During Growth

Prof Fena Dina, ITC, Hona Kona Polytechnic University, Hona Kona

Atomic simulation of perfect single walled carbon nanotubes (SWCNT)

Mr Ziwei Xu, TC, Hona Kona Polytechnic University, Hona Kona, Hong Kona, Hong Kona

Theoretical Analysis on Influence of Defects on AC Transport in Metallic Single-Walled Carbon Nanotubes

Mr Daisuke Hirai, Department of Materials Engineering, The University of Tokyo, Japan

Controlling the Electrical Behavior of Semiconducting Carbon Nanotubes via Tube Contact

Professor Helio Chacham, Universidade Federal de Minas Gerais, Brazil

Towards experimental measurement of anomalous dispersion forces between metallic nanotubes or nanowires

Prof John F Dobson, Queensland Micro and Nano Technology Centre, Griffith University, Australia

Charge Nitrogen Doped CNTs for CO₂ capture

Yan Jiao, School of Chemical Engineering, the University of Queensland: Centre for Computational Molecular Science (CCMS), Australia

53
Non Carbon Nanotubes & Sheets:

Meeting Room P4
Functionalization, dispersion, and cutting of boron nitride nanotubes in water

Prof Yoke Khin Yap, Michigan Technological University, United States

Thin Boron Nitride Nanotubes with Exceptionally High Strength and Toughness

Dr Yana Huang, School of Mechanical and Mining Engineering, University of Queensland, Australia

Fusion of "Black" and "White" Graphenes: A Composite Two-Dimensional BN-C Nanomaterial

Dr Amir Pakdel, National Institute for Materials Science (NIMS), Japan

Controlled synthesis of hexagonal boron nitride films on copper foil via low pressure chemical vapor deposition

Dr Teng Gao, Center for nanochemistry, College of Chemistry and Molecular Engineering, Peking University, China

Dynamic negative compressibility of few-layer graphene, h-BN and MoS₂

Professor Helio Chacham, Universidade Federal de Minas Gerais, Brazil

Colloidal Semiconductor Nanowires

Zhen Li, ARC Centre of Excellence for Functional Nanomaterials, Australian Institute for Bioengineering and

Afternoon Tea

Plaza Foyer

16:15	<p>32 <u>Functional Carbon Composites: Energy Storage</u> Meeting Room P2 <u>Carbon nanotube - metal oxide composites for lithium rechargeable batteries and supercapacitors</u> Hua Kun Liu. Institute for Superconducting & Electronic Materials. ARC Centre of Excellence for Electromaterials Science, Australia <u>CVD Nanotube Networks with Tailored Microstructure for High-Performance Transparent Conductive Electrodes</u> Dr Dona Youna Kim. Department of Chemical System Engineering. School of Engineering. The University of Tokyo. 7-3-1 Honso, Bunkyo-ku, Tokyo, Japan <u>MnO₂/PSS/CNTs composite electrodes synthesized by a layer-by-layer deposition method and its application in the membrane capacitive deionization technology</u> Juan Yana. SA Water Centre for Water Management and Reuse, University of South Australia, Australia <u>Vertically-aligned carbon nanotube membrane with zeolite imidazolate frameworks as selective layer for hydrogen separation</u> Lei Ge. The University of Queensland. School of Chemical Engineering, Brisbane, Australia <u>3D Carbon Nanomaterials for Energy Applications</u> Prof Yona Liu. Institute of Advanced Materials for Nano-Bio Applications and School of Ophthalmology and Optometry. Wenzhou Medical College, China</p>	<p>40 <u>Graphene: Characterisation</u> Meeting Room P1 <u>Fibers of solution-spun wrinkled graphene</u> Professor Seon Jeona Kim. Center for Bio-Artificial Muscle and Department of Biomedical Engineering. HanYang University, Seoul, Korea <u>Dirac Spectrum in Strongly Bound Graphene System</u> Mr Yuanchang Li, Department of Physics. Tsinghua University, Beijing, China <u>Raman spectroscopy of graphene grown on copper substrates</u> Dr Sara D Costa, Dep. de Fisica, Universidade Federal de Minas Gerais. Belo Horizonte, Brazil <u>XAFS and TEM-EELS studies on the electronic state and crystallographic structure of graphene on nickel catalyst</u> Dr Takashi Matsumoto. Low-power Electronics Association & Project (LEAP). Japan <u>G band Raman intensity of twisted bilayer graphene</u> Dr Kentaro Sato. Tohoku University, Japan</p>	<p>45 <u>Metrology & Methodology: Reaction</u> Meeting Room P3 <u>Absorption and luminescence microscopies at the single nanotube level</u> Laurent Coanet. Université de Bordeaux, France <u>Molecules Interaction Directed Separation of Semiconducting/Metallic Single-Walled Carbon Nanotubes</u> Prof Jin Zhana. Center for Nanochemistry. Peking University, China <u>Single-Wall Carbon Nanotube Reference Materials -Tools for Metrology</u> Dr Jeffrey A Faan. National Institute of Standards and Technology. United States <u>Chemical Reactivity of Single-Walled Carbon Nanotubes upon Their Chiral Structure</u> Dr Hua Jiana. Department of Applied Physics. Aalto University, Finland <u>Observation of fusion reactions in Single-walled Carbon Nanotubes using micro-sized nanocarbon heater</u> Mr Sihang Zhao. Department of Chemistry. Nagoya University, Japan</p>	<p>50 <u>Theory & Modelling of Graphene</u> Meeting Room P5 <u>Electromechanical actuation of pristine graphene and graphene oxide: origin and optimization</u> Zhe Liu. Department of Mechanical and Aerospace Engineering. Monash University, Australia <u>Electronic structures of graphene ribbons encapsulated in carbon nanotube</u> Dr Susumu Okada. University of Tsukuba, Japan <u>Angle dependence of the Landau level spectrum in twisted bilayer graphene</u> Student Youna-Hwan Hyun. Department of Physics. Sunakvunkwan University, Korea <u>Site-dependent Stability and Electronic Structure of Single Vacancy Point Defects in Hexagonal Graphene Nanoflakes</u> Dr Hongqiang Shi. Applied Physics. RMIT University, Melbourne, Victoria. 3000. AUST; CSIRO Materials Science and Engineering. Clayton, Victoria. Australia <u>Energetics and electronic structures of graphene corner edges</u> Nauven Thanh Cuong, National Institute of Advanced Industrial Science and Technology, Japan</p>	<p>54 <u>Non Carbon Nanotubes & Sheets:</u> Meeting Room P4 <u>Vibronic fine structure in high-resolution x-ray absorption spectra from boron nitride nanotubes</u> Mladen Petracic, Department of Physics and Center for Micro and Nano Sciences and Technologies, University of Rijeka, Croatia <u>Plasma functionalization and doping of nanotubes</u> Dr Luhua Li. Institute for Frontier Materials, Deakin University, Australia <u>Polymer-Based Plasmonic Superlattice Nanosheets</u> Mr Yi Chen. Department of Chemical Engineering. Monash University, Australia <u>Highly Flexible MoS₂ Thin-Layers Transistor with Ion Gel Dielectrics</u> Taishi Takenobu. Waseda University, Japan <u>Electrically Tunable Band Gap in Silicene</u> Dr Viktor Zólvomi, Lancaster University, United Kingdom</p>
